

DB Lab 11 Tasks

1.

```
1 use inventoryDB;
2
3 db.createCollection("furniture");
4
5 db.furniture.insertMany([
6   {name:"Chair",color: "Brown", dimensions:[12,18]},
7   {name:"Table",color: "Brown", dimensions:[35,70]},
8   {name:"Shelf",color: "White", dimensions:[20,60]}
9 ]);
```

Output:

```
switched to db inventoryDB
{ "ok" : 1 }
{
  "acknowledged" : true,
  "insertedIds" : [
    ObjectId("6938497f1f7189b20539204c"),
    ObjectId("6938497f1f7189b20539204d"),
    ObjectId("6938497f1f7189b20539204e")
  ]
}
```
2.

```
1
2 db.furniture.insertOne({name: "Desk",color: "Brown",dimensions: [50, 100]});
```

Output:

```
{
  "acknowledged" : true,
  "insertedId" : ObjectId("693849f11f3a6fd18a4dd839")
}
```
3.

```
1 db.furniture.find({ "dimensions.0": { $gt: 30 } });
```
4.

```
1 db.furniture.find({color: "Brown",name:{ $in:["Table", "Chair"]}})
```
5.

```
1 db.furniture.updateOne({name:"Table"},{$set:{color: "Ivory" }});
```
6.

```
1 db.furniture.updateMany({color:"Brown"},{$set:{ color: "Dark Brown"}});
```
7.

```
1 db.furniture.deleteOne({ name: "Chair" });
2
```
8.

```
1 db.furniture.deleteMany({ dimensions: [12, 18] });
2
```
9.

```
1 db.furniture.aggregate([
2   $group:{_id:"$color",count:{$sum:1}},
3   {$project: {color: "$_id", count: 1, _id: 0}},
4   {$sort: { count: -1 }}
5 ]).toArray();
```
10.

```
1 db.furniture.createIndex({name:"text"});
2
3 db.furniture.find({$text:{$search:"table"}})
```
